4 Most Common Reasons for Replacing Skylights

Whether you're replacing a dilapidated skylight, upgrading the thermal performance of a window/wall system, or simply replacing a storm damaged daylighting system, we have a solution to fit your needs and budget.

1 *Broken*

Whether it be broken panels or impaired functionality, you may choose to replace your old skylight to gain the enhanced convenience and beauty of our newest generation of products.

2 *Degradation Affecting Performance*

Why suffer through poor light quality and thermal performance? By replacing an old skylight, you can enjoy the modern benefits of increased energy efficiency and better quality of light.

3 *Leaking*

Water intrusion can cause significant damage in your building, be it slow or sudden. Replacing your leaking unit with one of our standard or custom-built skylights will allow you to permanently resolve this issue quickly and easily.

4 *Wrong Application/Lighting Solution*

It's important to know how to best utilize skylights in your commercial space. When defining the interior of a space, you may find you want to alter or enhance the effect a skylight has by updating it with a different style or new function.

Is It Difficult to Replace Skylights?

We would first set up a site visit to determine the best daylighting product and to examine the curb conditions and dimensions.

- Quote

Based on the site visit, we will generate a quote and upon your approval, supply submittal drawings.

- Fabrication & Shipping

Once the submittal drawings are approved, we will fabricate any custom products to be shipped to the jobsite or ship a standard product from our inventory.

- Installation

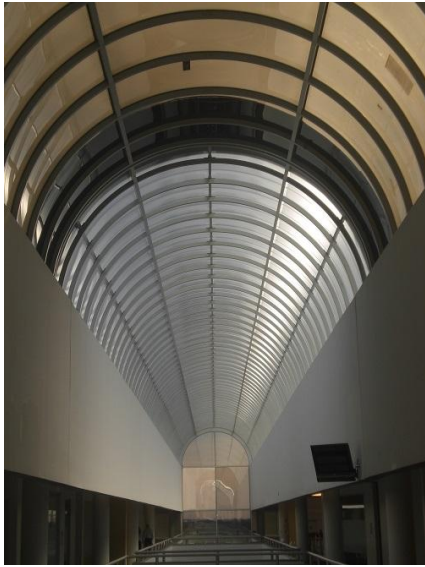

If you choose RPC as your installation company, we will provide all the necessary equipment to remove & dispose of the old skylights and install the new ones.

No matter what the system, our goal is your satisfaction. From initial quote to manufacture to installation and beyond, our products are only as good as our customer service, and we want to make finding, specifying, ordering and installing our daylighting systems as simple and worry-free as possible.

Since 1996, RPC has been providing and installing custom skylight systems. Contact us today to help with your next project.
